Not only do we offer auto battery replacement services, we are also a pre-owned luxury vehicle dealer.

Signs of a Failing Battery

Most drivers are not sure when they should replace their battery but there are a few signs you can look out for and know when to replace car battery. These include;

- In the recent past you have had to regularly jump start your car
- Your car has been struggling to start but it actually does not start
- The car's electrical components are not working at their optimum for example the lights are dim or flickering or the windows are starting to roll down slower than usual
- You have noticed corrosion of the battery cables

Do not wait until it is too late, if you notice any of the above signs do not hesitate to bring your car to iAUTOHAUS in Tempe, AZ for a free battery testing.

How Do You Prolong the Battery Life?

After having your battery replaced, our knowledgeable technicians will offer some advice on how you can prolong your battery life. ***You can prolong the battery life by ensuring it is serviced on a regular basis.*** This can be done by performing a battery test to find out how much more life the battery has in it or it is finally time to replace the battery. To prolong the battery life you can unplug power adapters when you are not using the vehicle. You can also clean the terminals of the battery to prevent corrosion. Our technicians will also advise you on ***how often*** to replace car battery.
