Learn How to Jumpstart a Car BEFORE You Need to Know How

Have you ever found yourself on the side of the road with a dead battery? If not, count yourself lucky! At [iAUTOHAUS](https://iautohaus.com) we want you to know what to do if you find yourself in this situation. ***Learning how to start a car with a dead battery is an important skill to have, and once you're on the road again, come by [iAUTOHAUS](https://iautohaus.com) for a new battery that won't die on you!***

Jumpstarting a Car When Your Car Battery is Dead

Do you know how to jumpstart a car battery in the event that your car battery died? Connecting jumper cables is pretty simple, just match the colors on the cables to that on each battery and you can jumpstart your car. ***The engine of the other car should be running once the clamps have been attached***, and you will likely need to turn over your engine a few times to get it started. Learning ***how to hook up jumper cables*** is something that every responsible vehicle owner should know how to do, and ***if you're not sure, just ask the crew at [iAUTOHAUS](https://iautohaus.com) to give you a quick tutorial the next time you are at the shop.***

- Connect the RED clamp to the positive (+) terminal of the dead battery, then repeat the process on the live battery.
- Connect the BLACK clamp to the negative (-) terminal of the live battery.
- Connect the other BLACK clamp to non-painted grounded metal on the vehicle with the dead battery.

- Ensure that the cables are free of the engine and that they won't get tangled in any moving engine parts.
- Rev the good car to charge the disabled car, waiting at least 60 seconds before trying the dead car.

With the Right Battery You Won't Need to Know How to Jumpstart a Car with Jumper Cables

Luxury car owners expect their vehicles to be dependable and reliable, and ***if you are taking your car to the right shop for your European vehicle*** you won't need to know how to jumpstart a car with jumper cables. ***At iAUTOHAUS, we make sure that every luxury European car that leaves our shop is road-ready*** and does not have a dying car battery. Yes, knowing how to jumpstart a car is a good skill to have, and we recommend that you review how to use your jumper cables, but it is always preferable to not have to use this skill!
