Active Distance Assist DISTRONIC

Activating/deactivating

- ① Switches on with the current speed or the last set speed
- ② Deactivates Active Distance Assist DISTRONIC

Changing the speed

- ③ Increases the speed or stores the current speed
- ④ Decreases the speed or stores the current speed
- ⑤ Increases the specified minimum distance
- ⑥ Reduces the specified minimum distance

Active Distance Assist DISTRONIC maintains a constant speed which has been stored. The lowest speed that can be set is 20 mph (30 km/h).

You can change the set speed:

- 1 mph (1 km/h) step:** Briefly press the lever up or down.
- 5 mph (10 km/h) step:** Press the lever up or down past the pressure point.

When Active Distance Assist DISTRONIC is activated, one or two segments in the set speed range light up in the speedometer.

Using the controller on the DISTRONIC lever, you can change the specified minimum distance to the vehicle in front. The specified minimum distance depends on the currently driven speed.

Note that your vehicle may not be equipped with all features described.

Climate control

Adjusting automatic climate control

You can adjust climate control using the buttons on control panel ①. If you change ② briefly shows the current climate control settings.

Climate control control panel

- Defrosts the windshield
- Sets climate zones separately
- Activates or deactivates the climate control cooling function.
- Defrosts the rear window
- Reduces the airflow
- Increases the airflow
- Completely activates or deactivates climate control.
- Sets climate control to automatic
- Air-recirculation mode
The air in the interior will be recirculated. In air-recirculation mode, the windows can fog up more quickly.
- Residual heat with the engine off
- Sets the air distribution
- Sets the air distribution

General notes

Climate control regulates the temperature and the humidity in the vehicle interior and filters undesirable substances out of the air. Climate control is only operational when the engine is running. Optimum operation is only achieved when the side windows and the roof are closed.

To prevent the windows from fogging up, please observe the following information:

- Switch off automatic climate control only briefly
- Switch on air-recirculation mode only briefly
- Switch on the cooling function. In warm weather, the air inside the vehicle will be cooled. This function also dries the air inside the vehicle.
- If necessary, briefly switch on the windshield defroster.
